Sir:

In response to the Office Action dated June 29, 2005, please reconsider the patentability of the pending claims based on the following remarks.

Preliminarily, it is respectfully submitted that the finality of the June 29 Office Action is premature and must be withdrawn. The Office Action asserted, at section number 3 on page 3, that the "applicant's amendment necessitated the new ground of rejection presented in this office action. However, the response to the previous Office Action did not first introduce the features of "M/N multiplexers." Rather, those features were present in the independent claims prior to the filing of the previous response. Those features were introduced to the claims in a preliminary amendment filed when the application was initially filed. Thus, the April 11, 2005 Amendment did not introduce amendments that have necessitate the new ground of rejection.

MPEP §706.07(a) states: "Under present practice, second or subsequent actions on the merits shall be final, except where the examiner introduces a new ground of rejection that is neither necessitated by applicant's amendment of the claims nor based on information as submitted in an Information Disclosure Statement filed during the period set forth in 37 C.F.R. 1.97(c) with the fees set forth in 37 C.F.R. 1.17(p)."
